## Explosive Detection Card Catalog

### Explosive Detection Cards for Every Scenario

SEEKER Pro detection cards offer highly specialized and reliable solutions for a wide range of applications. Explore our catalog of test cards to find the precise detection solution that best suits your operational requirements.

Email or call to order. SEEKER Pro Explosive Detector is required for operation. Cards cannot be used without a device.

#### General Explosives Card (Go-to solution for 95% of scenarios)

Detects all major groups of explosives, including Nitroaromatics (like TNT), Nitramines / Nitrate Esters (like C4 or smokeless powder), Inorganic Nitrates (like Ammonium Nitrate), Chlorates (like Potassium Chlorate) and Peroxides (like TATP).

BEST  
SELLER

#### Homemade Explosives Card

For use specifically in HME labs for precursor and explosive product detection. Offers increased sensitivity for Inorganic Nitrates, Chlorates and Peroxides. Detected explosives include TATP,  $\text{KNO}_3$ , ammonium nitrate, urea nitrate and IED's.

#### Inorganic Nitrates Explosives Card

Best solution for black powder detection. Detects ammonium nitrate, black powder ( $\text{KNO}_3$ ) and Urea nitrate. It is highly sensitive and selective for all inorganic nitrates.

#### Chlorates / Perchlorates Explosives Card

Combination test card specific for detection of chlorates, such as  $\text{KClO}_3$  and  $\text{NaClO}_3$ , as well as perchlorates, such as  $\text{KClO}_4$  and  $\text{NaClO}_4$ .

## Drug Detection Card Catalog

### Drug Detection Cards for Every Scenario

SEEKER Pro detection cards are available for every major drug and narcotic. Explore our catalog of test cards to find the precise detection solution that best suits your operational requirements.

Email or call to order. SEEKER Pro Explosive Detector is required for operation. Cards cannot be used without a device.

#### Multi-Drug Card

Tests for multiple drug classes in one card, including fentanyl, meth, amphetamines, MDMA, heroin, and cocaine. A versatile option for comprehensive screening needs.

#### THC / CBD Card

Differentiates between cannabidiol (CBD) and tetrahydrocannabinol (THC). Useful for compliance testing where THC presence is restricted.

#### Methamphetamine / MDMA Card

Targets methamphetamine and MDMA (ecstasy). Helps identify stimulant and party drug use quickly and accurately.

#### Cocaine Card

Targets cocaine and its primary metabolites. Ensures rapid identification of stimulant use in various settings.

# Drug Detection Card Catalog - Continued

## Heroin Card

Detects heroin and related opiate metabolites. Ideal for black tar, brown, and white heroin.

## Synthetics Card

Detects synthetic drugs such as synthetic cannabinoids (K2s, Spice, JWHs), synthetic cathinones, and other synthetics including 2C-B.

## Cannabis Card

Screens for organic cannabis. Provides quick results for detecting any level of THC, CBD, or hemp material.

## Nicotine Card

Detects nicotine and related compounds. Useful for testing tobacco-related products, such as cigarettes, chewing tobacco, vapes, pipes and nicotine pouches.

## DMT Card

Detects dimethyltryptamine, a powerful hallucinogen. Can detect DMT in various forms, such as bark, shredded materials, powders, and consumer products.

## Ketamine Card

Screens for ketamine, a dissociative anesthetic with abuse potential.

## Special Opiates Card

Targets specific opiates beyond standard heroin detection. Ideal for advanced opioid screening protocols. Detects Suboxone® (buprenorphine), opiates, and MDMA (ecstasy).

# Drug Detection Card Catalog - Continued

## General Drug Screening Card

Covers a broad spectrum of common illicit substances. Perfect for initial screening when multiple drug classes are a concern. Detects opiates, meth, amphetamines, MDMA, and fentanyl.

## GHB Card

Identifies gamma-hydroxybutyrate, often associated with recreational and illicit use.

## PCP Card

Screens for phencyclidine, a dissociative hallucinogen.

## Benzo Card

Detects benzodiazepines commonly used as sedatives or anti-anxiety medications. Ideal for identifying misuse or abuse of prescription tranquilizers. Includes detection for alprazolam (Xanax®), lorazepam, and more.

## Psychedelics Card

Covers a range of hallucinogenic substances, such as LSD and psilocybin.

**If you have any questions about what test cards are right for your detection needs, please reach out using the contact info below and a member of the DetectaChem team will be happy to assist you.**
